

SUSHMA REDDY

Software Engineer

+1(940)843-7126 | sushmavootla.1999@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

SUMMARY

Software Engineer with 2.5+ years of experience in **enterprise web application development**, specializing in building, enhancing, and optimizing applications using **Java, Spring Boot, ReactJS, SQL, and REST/SOAP APIs**. Proven ability to deliver scalable, secure, and high-performing solutions while also supporting deployment, CI/CD (Jenkins, Maven), logging, monitoring, and UAT/Production activities. Strong team collaborator in Agile/Scrum environments, contributing to high-quality releases, compliance standards, and exceptional user experience.

EDUCATION

The University of Texas at Dallas - Naveen Jindal School of Management

Aug 2023 - May 2025

Master of Science in Business Analytics and Artificial Intelligence

GPA: 3.72

JNTUHCEJ, Hyderabad (Bachelor of Technology)

Aug 2016 - May 2020

SKILLS

- **Languages:** Java (8/11), J2EE, SQL, JSON, JDBC, Servlets
- **Frameworks:** Spring Boot, Spring MVC, Hibernate, Spring-core, Spring Webservices, SOAP/REST API'S
- **Web Technologies:** ReactJS, React Hooks, HTML5, CSS, JavaScript, Bootstrap, Responsive UI
- **Databases:** SQL Server, MySQL, MongoDB, Oracle
- **Cloud:** AWS (EC2, S3, RDS, IAM, CI/CD Integration)
- **Tools & Platforms:** IntelliJ IDEA, VS Code, Eclipse, Postman, JIRA, Tomcat, WebSphere
- **DevOps & Build:** Git, GitHub, Bitbucket, Maven, Jenkins, Docker
- **Testing & Quality:** JUnit, Postman API Testing, Debugging, Performance Troubleshooting
- **Development Practices:** Agile/Scrum, TDD, Unit & Integration Testing, Monitoring & Logging, RCA, Code Reviews, Clean Code
- **Analytics & Visualization:** Python, Tableau, Hadoop
- **Operating Systems:** Windows, Linux, UNIX

EXPERIENCE

Company: Spesh Talent

Aug 2024 - Dec 2024

Role: Software Engineer Intern

TX

- Developed responsive web features using **ReactJS, JavaScript, HTML, and CSS**, improving usability and reducing manual navigation effort for users.
- Assisted in building and integrating **REST APIs using Java, Spring Boot, and Node.js** to support customer servicing and account management modules.
- Supported backend enhancements by refining **SQL** queries, contributing to improved data retrieval speed and performance.
- Helped implement **secure authentication and API communication practices**, supporting compliance and protecting sensitive financial data.
- Assisted with **debugging and issue resolution**, helping resolve **bugs** during development and UAT cycles to stabilize releases.
- Supported **CI/CD workflows** using **Git, Jenkins, Maven, and Docker**, contributing to smoother and more consistent deployments.
- Collaborated with **Agile teams** through daily stand-ups, sprint planning, and reviews, consistently completing assigned tasks within sprint timelines.

Company: Cognizant

Mar 2021 - Jun 2023

Role: Software Engineer

India

- Developed and enhanced **web applications** for policy management, claims processing, customer servicing, and internal business teams using **Java, Spring Boot, REST APIs, and ReactJS**, improving feature delivery and reducing manual efforts by **25%**.
- Built **responsive, user-friendly web interfaces** using ReactJS, Hooks, JavaScript, HTML5, CSS3, and Bootstrap, improving usability and reducing user navigation time by **30%**.
- Designed and consumed **RESTful APIs** integrating policy, customer, and claims data, ensuring secure and reliable data exchange which improved processing efficiency and reduced API failures by **15%**.
- Worked on **SQL Server databases**, writing optimized queries, joins, and stored procedures, helping improve data retrieval performance and reducing response time on key modules.
- Implemented **authentication, role-based authorization, and secure API communication**, strengthening system security and compliance with AXA internal security standards.

- Actively participated in **Agile Scrum delivery**, contributing to sprint planning, estimation, daily stand-ups, demos, and retrospectives, supporting **on-time sprint delivery**.
- Handled **application maintenance and enhancements**, resolving incidents, fixing defects, performing RCA, and stabilizing critical insurance modules, helping reduce recurring production issues by **20%**.
- Used **Git and ClearCase** for source control and collaborative development, improving code quality and reducing integration conflicts through structured branching and peer reviews.
- Supported **Jenkins CI/CD pipelines and deployments** on Tomcat across Dev, QA, UAT, and Production environments, contributing to **faster and error-free releases**.
- Implemented **application logging, health checks, and monitoring support**, enabling faster troubleshooting and reducing issue resolution time (**MTTR**) by **30%**.
- Collaborated closely with **QA, Business Analysts, Product Owners, and Operations teams**, ensuring requirement clarity and smoother business releases, helping improve UAT acceptance rate.
- Performed **UAT and Production deployment**, validating functionality, coordinating fixes, and ensuring stable customer experience with minimal downtime.
- Managed build artifacts using **Nexus Artifactory**, improving deployment traceability and ensuring version control accuracy.
- Contributed to **technical documentation, deployment guides, and support notes**, helping improve team knowledge sharing and onboarding efficiency.

ACADEMIC PROJECTS

Public Health Data Analytics with Python & Tableau | *Python, SQL, Tableau, Data Cleaning, EDA, Data Visualization*

Relational Database & BI for Delivery Optimization | *SQL (MySQL), Tableau, Data Modeling, Business Intelligence (BI)*

Big Data Risk Analytics with Hadoop & Spark | *Hadoop, Spark, Hive, Impala, Tableau, JDBC*

Machine Learning Models for Socioeconomic Profiling | *R, tidyverse, caret, rpart, neuralnet, ggplot2*

Real-Time Data Lakehouse & ETL Pipeline on AWS | *AWS S3, Glue, Lambda, Athena, QuickSight, SQL*
