SUMMARY

Software Engineer with 2+ years of experience designing, developing, and supporting enterprise applications. Skilled in **Java, Spring Boot, RESTful APIs, SQL/Oracle**, and deployment workflows using **Maven, Unix/Linux, and ServiceNow** in **Agile/ITIL environments**, ensuring **99.9% system uptime** and secure, stable operations.

Hold an **M.S. in Business Analytics & AI** from **UT Dallas**, with expertise in **machine learning, predictive modeling, econometrics, and A/B testing**. Strong background in **cloud computing (AWS), big data**. Adept at delivering **scalable, data-driven business solutions** by bridging **software engineering, analytics, and cloud platforms**.

EXPERIENCE

Programmer Analyst → Senior System Engineer (Software Engineer)

Mar 2021 - Jun 2023

Cognizant Technology Solutions

Hyderabad, India

AXA UK - BAU Run Application Management & Development

- Developed and enhanced **Web Services** and **RESTful APIs** using **Core Java, Spring Boot, Spring Framework** within **Eclipse IDE**, implementing robust **logging** and **exception handling** with **SLF4J** and **Log4j**, reducing manual intervention by 20%, improved system stability, and accelerated **root cause analysis** by 40%.
- Delivered comprehensive L2/L3 production support for 12+ critical Java & Spring Boot microservices across AXA UK's insurance platforms, using **ServiceNow** for **incident/problem/change management**, implementing proactive dashboard monitoring, **SLA tracking**, and **license management** to achieve **99.9% uptime** and **100% SLA compliance**.
- Developed and optimized **SQL queries** and **stored procedures** across production databases including **Active Directory** and AXA insurance systems, performing **database administration** and **query performance tuning** to deliver **100% accurate monthly, quarterly, and ad-hoc reports** with zero discrepancies.
- **Orchestrated end-to-end deployment** workflows using ServiceNow change management and **Maven build automation** in **Unix (Putty, WinSCP)**, conducting **impact analysis** to achieve 100% deployment success rate and zero critical failures.
- Implemented comprehensive post-deployment validation processes, including **batch job monitoring, middleware operations, and server restarts** using enterprise **dashboard monitoring tools**, ensuring stable performance and business continuity for AXA UK's critical insurance systems.
- Executed **vulnerability** remediation initiatives by **upgrading outdated JAR files**, resolving **Maven dependency issues**, coordinating **SSL certificate renewals**, and supporting **penetration testing (Pen Testing)** activities improving compliance by 100% and reducing security vulnerabilities by 30%.
- Maintained and integrated SOAP/REST APIs and third-party services, leveraging **SoapUI** for testing to ensure **accurate financial validations** and **seamless data exchange** between AXA UK systems and external providers.
- Administered **Nexus Repository** for **Java build artifacts** and **dependency management**, configuring **OPCO** and **ESR systems**, while ensuring proper **artifact versioning** and alignment with AXA UK operational processes.
- Utilized Genesys Framework and Web Service Gateway for repository and service integration, maintaining smooth connectivity, reliable system integration, and supporting complex insurance workflows with third-party providers.
- Authored and maintained **SOPs, KEDB documentation, and deployment checklists** on **AXA SharePoint** in line with **ITIL best practices**, reducing onboarding time by 30%, operational load by 20%, and improving team knowledge retention.
- Managed the complete lifecycle through ServiceNow Incident, Problem, and Change Management and performing **monthly, quarterly, and yearly system updates** with **100% accuracy** and full **audit compliance**.
- **Collaborated cross-functionally** with **Infrastructure, QA, UAT, and Product Vendor teams** under **Agile methodology**, streamlining **release cycles**, resolving integration challenges, and maintaining on-time delivery with zero critical production failures.

EDUCATION

The University of Texas at Dallas - Naveen Jindal School of Management

Aug 2023 - May 2025

Master of Science in Business Analytics and Artificial Intelligence

GPA: 3.72

Jawaharlal Nehru Technological University, Hyderabad

Aug 2016 - May 2020

Bachelor of Technology in Mechanical Engineering

GPA: 3.40

SKILLS

Languages	Core Java, Python, R, SQL
Frameworks & Libraries	Spring Boot, Spring Framework, REST/SOAP APIs, Web Services, SLF4J, Log4j, JUnit, ggplot2, Matplotlib, Seaborn, tidyverse, caret, rpart, neuralnet
Databases	SQL, Oracle DB, MySQL, SQL Server, Hadoop, Spark, Hive, Impala
Cloud Platforms (AWS)	S3, Glue, Lambda, Athena, Quick Sight, Cloud Computing Concepts
Concepts & Pipelines	ETL Pipelines, Data Warehousing, Data Modeling, Data Lakes, ER Modeling, Star Schema, OLAP/OLTP
Machine Learning	Supervised & Unsupervised Learning, Predictive Modeling, Prescriptive Analytics, Decision Trees, Logistic Regression, Neural Networks, Model Validation, Cross-Validation, Bias-Variance Tradeoff
Statistical Analysis	Econometrics (OLS, 2SLS, IV Regression, Hausman Test), A/B Testing & RCTs (ROAS, CTR, CAC), Exploratory Data Analysis (EDA), Hypothesis Testing, ANOVA, Regression Analysis
Visualization	Tableau, ggplot2, Matplotlib, Seaborn
Tools	ServiceNow (Incident/Problem/Change Management), Silva, Maven, Putty, WinSCP, Nexus Repository
Methodologies	Agile Methodology, ITIL Processes, Cross-Functional Stakeholder Management (QA, UAT, Infra, Vendors), Release Management, Deployment Validation, Project Collaboration
Security & Compliance	Vulnerability Remediation, SSL Certificate Management, Dependency Upgrades

ACADEMIC PROJECTS

- **Real-Time Data Lakehouse & ETL Pipeline on AWS** | AWS S3, Glue, Lambda, Athena, QuickSight, SQL
*Designed and implemented a **scalable ETL pipeline in AWS** to automate processing of YouTube trending data; used AWS Glue for cataloging & transformation, optimized queries with Athena, and delivered **dashboards** for **real-time analytics**.*
 - **Big Data Risk Analytics with Hadoop & Spark** | Hadoop, Spark, Hive, Impala, Tableau, JDBC
*Analyzed **7+ real-world fleet datasets** to identify high-risk drivers, violation hotspots, and insurance risks for AZ National Trucking; built and automated **15+ live Tableau dashboards** connected to a Hadoop cluster via JDBC.*
 - **Public Health Data Analytics with Python & Tableau** | Python, SQL, Tableau, Data Cleaning, EDA, Data Visualization
*Cleaned and analyzed **CDC county-level COVID-19 data** to identify geographic, demographic, and socioeconomic factors influencing vaccine hesitancy; automated workflows in Python and built **interactive Tableau dashboards** to support **targeted public health recommendations**.*
 - **Machine Learning Models for Socioeconomic Profiling** | R, tidyverse, caret, rpart, neuralnet, ggplot2
*Built **Decision Tree, Logistic Regression, and Neural Network models** on UCI Adult Census data to predict income levels (>50K vs ≤50K), achieving **~81% accuracy** and generating interpretable insights to inform **policy and resource allocation**.*
 - **Econometric Analysis of Income Inequality** | R, Econometrics (OLS, 2SLS, IV Regression), Hausman Test, Inequality Analysis
*Applied **advanced econometric techniques** (OLS, 2SLS, IV Regression) in R to estimate the causal impact of education and occupation on income; addressed endogeneity with instrumental variables and subgroup analysis, producing **robust insights on income inequality**.*
 - **Relational Database & BI for Delivery Optimization** | SQL (MySQL), Tableau, Data Modeling, Business Intelligence (BI)
*Designed a **normalized MySQL database** for a courier delivery service, developed advanced **SQL queries** to track KPIs, and created **interactive Tableau dashboards** to optimize **delivery times, courier allocation, and customer satisfaction**.*
- 📌 **Practical Experience - Causal Analytics & A/B Testing**
*Designed and executed **A/B tests** and **RCTs** for marketing campaigns (Vungle Ads, Uber Express POOL, BIT, Behavior Change for Good) to evaluate **ROAS, CTR, CAC** and measure treatment effects.*
